

StudyBuddy Test Academic Material

Sample Transcript, Syllabus and Course Notes

Student: Ananya Reddy

Program: B.Sc. Data Science

Semester: 5

1. STUDENT TRANSCRIPT

Course	Grade	Marks
Python Programming	A+	92
Statistics	A	86
Machine Learning	A	89
Database Systems	B+	78
Data Visualization	A	84
Mathematics	B	69

2. SYLLABUS

Python Programming

• Functions • Lists and Dictionaries • OOP • File Handling • Modules • Exception Handling

Statistics

• Probability • Random Variables • Distributions • Sampling • Hypothesis Testing • Correlation

Machine Learning

• Regression • Classification • Clustering • Model Evaluation • Feature Selection

Database Systems

• ER Model • SQL • Normalization • Joins • Indexing • Transactions

Data Visualization

• Matplotlib • Seaborn • Charts • Dashboards • Data Storytelling

Mathematics

• Matrices • Differentiation • Integration • Probability Basics • Linear Algebra

3. COURSE NOTES AVAILABLE

Python Programming

• Functions • Lists and Dictionaries • OOP • Modules

Statistics

• Probability • Random Variables • Distributions

Machine Learning

• Regression • Classification • Model Evaluation

Database Systems

- ER Model • SQL • Normalization

Data Visualization

- Matplotlib • Charts • Dashboards

Mathematics

- Matrices • Differentiation

4. EXPECTED TEST BEHAVIOR

The agent should identify Mathematics and Database Systems as relatively weaker subjects because their grades are B and B+. Missing-note topics should include Python Exception Handling, Statistics Sampling and Hypothesis Testing, Machine Learning Clustering and Feature Selection, Database Transactions and Indexing, Data Visualization Seaborn and Data Storytelling, and Mathematics Integration and Linear Algebra. The agent should produce a short prioritized study plan before the student asks a question.

Suggested retrieval tests: 'What is my Mathematics score?', 'Which Machine Learning topics are missing from my notes?', and 'What Statistics topics have I studied?'
