Software Engineering

- SDLC • Agile • Requirements

4. EXPECTED TEST BEHAVIOR

The agent should identify Operating Systems and Computer Networks as relatively weaker subjects because their grades are B and B+. Missing-note topics should include Java Exception Handling and Collections, Data Structures Queues and Trees and Graphs, Computer Networks Routing and Transport Layer and HTTP, Operating Systems Deadlocks and Memory Management and File Systems, Web Development Authentication and Responsive Design, and Software Engineering UML and Testing and Version Control. The agent should produce a short prioritized study plan before the student asks a question.

Suggested retrieval tests: 'What did I score in Data Structures?', 'What Computer Networks topics are missing from my notes?', and 'What did I study in Java?'
